- Wavelengths
- Dark fiber

Industries Served

FiberLight works with clients in the following industries:

- Education
- Energy
- Healthcare
- Government
- Professional Services (e.g. financial, legal)

The FiberLight Difference

Anyone can sell you network services and infrastructure, but the way we operate, from custom solutions to network management, is why you will choose FiberLight.

FiberLight Custom Solutions

Custom solutions support your organizations goals and objectives. We provide customizations in the following ways:

- FiberLight delivers bandwidth in any form, including Dark, Wave, SONET, Ethernet and IP
- Organizations have varied needs for network design, so we'll create yours around specific application and budget details
- We have the ability to create shared, dedicated and purpose built networks for your full spectrum of security needs, including dedicated fibers and electronics
- As your needs change, so will we. We support network changes, additions and requirements in a manner exceeding expectations

FiberLight Network Management

Our Network Operations Center is staffed 24/7 with FiberLight-trained engineers who are both technical experts and pleasant to work with. Our network management practices ensure our engineers and customers have unparalleled access to network through

- Proactive monitoring
- Automated service alerts
- Ticketing for both customers and engineers reflecting service
- Reports to compare against SLA
- Escalation lists with contacts for real people, not robots
