

Managed Wavelengths

FiberLight delivers managed wavelengths for organizations with massive data transport needs over Ethernet and SONET.

The FiberLight Difference

Our Network Operations Center is staffed 24/7 with FiberLight-trained engineers who are both technical experts and pleasant to work with. Our customer service practices ensure our customers have unparalleled access to cloud assets through

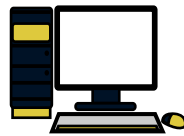

- Proactive monitoring
- Automated service alerts
- Ticketing for both customers and engineers reflecting service
- Reports to compare against SLA
- Escalation lists with contacts for real people

Move Your Data At The Speed Of Light

Our high-bandwidth, fiber optic networks ensure seamless integration and interaction with your data, allowing you to optimize communication across our fiber-rich footprint. FiberLight provides solutions tailored to your organization's unique needs. Your managed wavelengths will

Enable you to transmit data over **greater distances with less equipment** than copper wire.

Transmit your data faster and with fewer potential fail-points through dense, direct path networks.

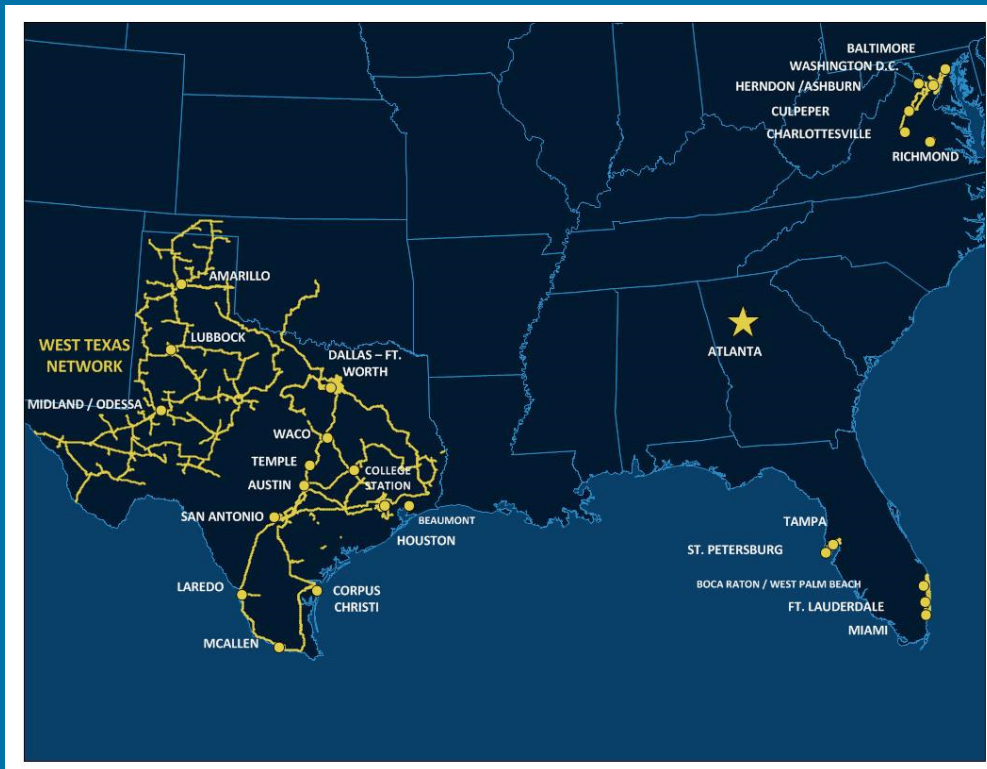

Ensure **data security**, as well as flexible and scalable networks, with dedicated solutions.

Optimize Your Fiber Investment

The FiberLight Wavelength product suite offers customization with network transparency for a solution designed to support your business objectives:

- Metro depth with diversity options
- Speeds from 1 GigE to 10 GigE
- Protected & unprotected point-to-point configurations
- Low-latency guarantees

FiberLight Delivers

FiberLight is trusted by 40 of the top 50 bandwidth providers in the US because we deliver secure, reliable and scalable solutions necessary to compete in today's fast-paced digital economy. FiberLight knows that each office has its own set of challenges based on employee count, critical functions and location in relation to your client base.

We work with you to develop and deliver custom networking solutions that fit your current requirements and can grow just as quickly as your business does. Every solution, no matter how tailored, comes with FiberLight's best in class service and support features, including:

- Network speeds ranging from 10Mbps to 10Gbps
- State of the art network infrastructure
- Around the clock service and support
- On-demand scalability
