DEDICATED INTERNET ACCESS

FIBERLIGHT

Our customized IP services include Dedicated Internet Access (DIA), Border Gateway Protocol (BGP), IPv4, and IPv6.

FiberLight designs, builds, and deploys mission-critical fiber networks and responsive customer experiences, ensuring business continuity and igniting digital transformation.

There are 3.8 billion connected devices in use today; There will be 50 billion by 2020!

Global data traffic will grow to 163 zettabytes by 2025

IoT could have an annual economic impact of $3.9 trillion to $11.1 trillion by 2025

What's In It For You?

IP addresses for **IPv4 or IPv6** protocols

Blended service offering with multiple tier-one internet providers for greater reliability

High-performance access with fully dedicated bandwidth

Next generation **data network interconnections** to key data centers

FiberLight is a trusted partner for organizations embarking on a **digital revolution**! We ensure **reliable, scalable connections** between your commercial location and the cloud.

Why FiberLight?

Nearly unlimited bandwidth that scales on demand

No middlemen means better business continuity

Collaborative codesign or strandard offerings for more choice and control

Flexible contracting and pricing

Optical Network Footprint in Fastest Growing Markets

Better Networks Start With Purpose-Built Fiber

FiberLight has decades of experience designing, engineering, building, and optimizing fiber optic networks. Our success in building better fiber networks has been driven by a simple formula: the right people in the right places making the right investments.

With a constant focus on simplicity, we've made it our mission to drive reliability for businesses, improve reach for network solutions, and enable partners. Our culture of hustle allows us to respond better than anyone else in the industry, enabling higher touch relationships that provide lasting business value. Every solution, no matter how tailored, comes with FiberLight's best in class service and support features, including:

/ Lit transport solutions from 10Mbps to 100Gbps
/ Codesigned, custom built Dark Fiber routes
/ State of the art network infrastructure
/ Around the clock service and support
