FiberLight

FiberLight

Business Fiber
Unleashed

RELIABLE NETWORK | RESPONSIVE PEOPLE | COMMITTED TO CUSTOMERS
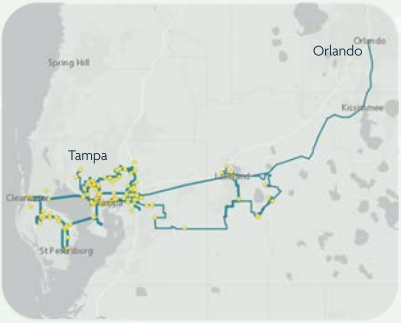

We've Got You Covered!

Texas

- **Fully Diverse, High-Capacity Fiber Routes**
- **Cost Effective, Low-Latency Solutions**
- **10+ Fully-Diverse MAR** (Metro Aggregation Route) **Fiber Rings** for Redundancy and Protection
- **10 Gbps, 100 Gbps, 400Gbps Capability**
- **Diverse Internet Gateways and Peering Points** — Premium Tier 1 IP Global IP Providers
- **Easy Access** to 80+ data centers
- **Extensive Coverage** — Further Reach Into Rural Areas
- **Fiber Route Diversity** — Route Protection Options Available
- **Premier Cloud Access** — Quick On-ramps to Top Tier Cloud Service and Web Hosting Providers

Atlanta, GA

- 12 fully-diverse MAR (Metro Aggregation Route) fiber rings for redundancy and protection
- Multiple layers of protection
- 21 data centers, core PoPs
- Alternative routes to avoid Sandy Springs

Tampa, FL

- 6 fully-diverse MAR (Metro Aggregation Route) fiber rings for redundancy and protection
- 8+ data centers, core PoPs, and carrier hotels
- Multi-directional fiber routes in and out of St. Petersburg

N. Virginia, DC, Maryland

- 7 fully-diverse MAR (Metro Aggregation Route) fiber rings for redundancy and protection
- 80+ data centers, core PoPs, and carrier hotels

Charlotte, NC - Atlanta, GA

- 100G and 400G Wavelengths
- Short and unique route between fast growing tech hubs

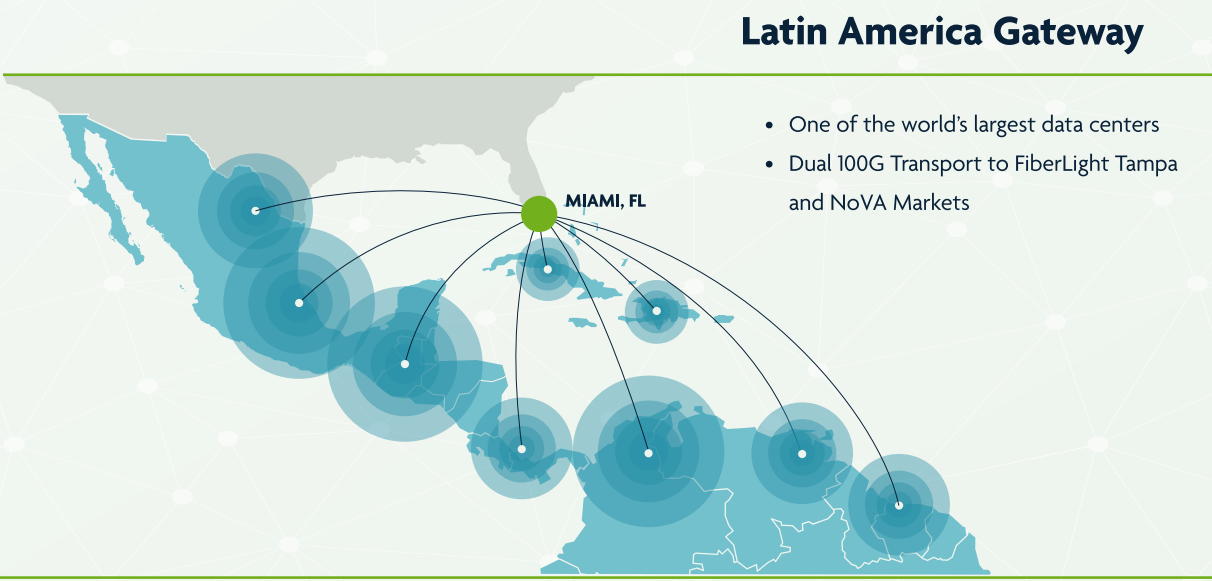

Local Provider
With a construction background, FiberLight has the experience, know-how, and expertise to design, build, execute, and maintain complex fiber networks.

Igniting Digital Transformation
Exceptional up-time for business continuity, seamless integration and interaction. We're ready when you are.

Services That Exceed
Provider of diverse, high-capacity network infrastructure to meet your network needs. Adaptable and flexible. Custom-built fiber solutions.

Latin America Gateway

- One of the world's largest data centers
- Dual 100G Transport to FiberLight Tampa and NoVA Markets

Network Infrastructure

Density
- High-count fiber routes
- Up to 1728 count strands in key metros
- Connected to 170+ data centers
- 17,970+ route miles of fiber

Diverse
- Network diverse from ILEC and MSO routes
- Ability to construct direct, custom-built paths
- Diverse entrances into buildings

Distinct
- Network far reaching into rural areas
- Fiber lies in places our competition does not
- Alternative paths and conduit from other carriers

Mission-Critical Solutions for High-Performance Networks

Dark Fiber
- Virtually Unlimited Bandwidth
- Increase Control
- Maximize Security
- Enjoy Peace of Mind

Data Center Interconnect
- Increase Efficiency
- Custom Paths Built for Customer Specifications
- Enable Bandwidth-Intensive Applications
- Increase Reliability
- Enjoy Faster Turn Up

Dedicated Internet Access
- Fully Dedicated Bandwidth
- Diverse Paths from MSO and ILEC
- Next Generation Data Network Interconnecting to Key Data Centers
- Peering with Tier1 ISPs

Ethernet Transport
- Seamlessly Extend Your Network
- Protected Core Infrastructure
- Offer More Reliability
- Connected to Over 180+ Data Centers

Cloud Connect
- Increase Performance
- Optimize Financial Resources (save egress fees)
- Streamline Network Management
- Maximize Security with a Dedicated Path to Your Public Cloud Provider
