

Product Brief

Dedicated Internet Access (DIA)

As traffic traversing the internet continues to increase, businesses are requiring a more scalable, reliable, high performing dedicated internet service to optimally run their operations between their LAN and the public internet. Whether you're a medium-sized business or a large enterprise, finding an internet service provider with a reliable network, dependable customer service, and a low latency connection to the internet is vital to keeping your business running smoothly.

FiberLight provides increased reliability, symmetrical bandwidth, and protected architecture so your business can focus on satisfying customers rather than managing a slow, unreliable internet service.

Key Benefits

Improved Performance

- Fully guaranteed bandwidth and low latency enabling improved application performance and user experience.

Deploy Faster Speeds

- Choose the symmetrical bandwidth to support your business and access to cloud-based services now and into the future with easily scalable bandwidth options up to 10 Gbps and more.

Increase Reliability

- Run your business without interruption on a protected fiber connection with service backed by multiple tier 1 internet providers, enabling more efficient IP routing and ensuring traffic reaches its intended destination quickly.

Diversity

- Fiber network that is separate from utility telecom network and cable operators to enable separation of the last mile transport of Internet and creating a fully diverse Internet infrastructure for your business.

Experience High-Touch Support

- NOC availability 24/7/365 for a quick response, helping ensure maximum internet service uptime for your critical business operations.

Service Details

- Internet service with Ethernet termination
- Symmetrical bandwidth (i.e., same speed up/down)
- Speeds between 10Mbps to 10Gbps and higher
- Default or BGP routing
- IPv4 and IPv6 address space support

Supported Businesses

- Rural businesses with need for high-speed internet performance
- Medium and Large Enterprises
- Education / Local Government
- Rural ISPs and Wireless Internet Service Providers (WISP)

Your Network Is In Good Hands

With 20 years of dedicated experience designing, engineering, and optimizing large-scale fiber networks, you can trust our regional expertise and enjoy high touch, personalized account management and dependable customer service. Plus, take advantage of new fiber—built in the last three to four years—

diverse from ILEC and Cable MSO providers on a fully owned, operated, and managed network, built completely through organic growth. Choose a stable provider with the flexibility to partner with you to design the network you need to take your business to the next level.

We are always working with new clients who will require additional network connections into the Carrier-1 facility. FiberLight is at the top of our list to either resell their services or recommend for direct services.

Trey Berndt
Executive Vice President, Carrier-1 Data Centers

For more than 20 years, FiberLight has led the industry in designing, building, and operating world-class fiber networks in over 430 U.S. cities and provides unmatched service to enterprises in densely populated metroplexes, hyperscalers in fast-growth technology hubs, and local governments, school districts, and healthcare systems in rural communities. Known as “the carrier’s carrier,” FiberLight owns 19,000+ route miles of dark and lit networks, which are among the industry’s most robust with the capability to provide the reliability, resilience, and flexibility customers need for growth. Backed by Morrison & Co, FiberLight continues to deliver innovative fiber network solutions to meet the next generation of demands from the evolving digital economy.
